# BAPS Charities hosts Walk Green 2018 for planet

Community members participate in the BAPS Charities Walk Green. /Photo contributed.

Community members of all ages came out with their families to support the annual BAPS Charities Walk Green 2018 in Dallas, TX on May 19, 2018 marks the third year that the annual BAPS Charities walkathon will benefit The Nature Conservancy and their effort to conserve the lands and waters on earth to sustain life for upcoming generations. BAPS Charities will contribute \$165,000, an equivalent of planting 130,000 trees, to The Nature Conservancy to support their initiative to plant a billion trees globally by 2025. In addition to supporting this global effort, this year's BAPS Charities walkathon also supported Irving Schools Foundation and the Irving Citizens Fire Academy Association. The Irving Schools Foundation provides financial resources to maximize educational opportunities for teachers and students in Irving ISD by funding innovative programs, scholarships, and activities that enhance creativity, leadership, and academic success.

Altogether, over 1200 participants attended the walk. "Coming out to support BAPS Charities is always rewarding, and it makes me feel proud to be helping The Nature Conservancy and its Plant a Billion Trees campaign. It is a great way for me to teach my children about protecting the planet and accepting environmental responsibility."

"This event is a great way for me to teach my children about protecting the planet and accepting environmental responsibility."

the past three years. BAPS Charities uses these opportunities to instill a spirit of service and com-

mitment to preservation and environmental responsibility in community members. An event such as this helps instill consciousness in community members surrounding their actions, and, in turn, helps inspire global harmony with nature.

Commenting on activities of BAPS Charities, Irving Mayor Rick Stopfer said, "There's so many good things that can be done and when you see everyone coming together, when you see these young people here realizing how important it is to volunteer and give back to the community, I want to thank BAPS for teaching us how to all work together and take care of the environment. The fact that we'll have 300,000 trees planted by the end of the year it is amazing!"

## CONFLANS ROAD

Continued from Page 1

ing areas, requiring an east-west collector to meet traffic demands and connect local traffic to arterial roadways," Abusaad said. "The purpose of this proposed project is to improve mobility and provide improved system connectivity. The existing Conflans Road is a major collector in the westernmost southwest portion of Irving, which terminates at SH 161."

Abusaad also gave a preliminary environmental review of the project. The project crosses the 100-year floodplain associated with Bear Creek and its tributary. The proposed project would permanently impact 1,085 linear feet (0.24 acre) of the intermittent tributary to Bear Creek and approximately 7.86 acres of Cross-timbers Woodland and Forest and 1.32 acres of river vegetation. Abusaad stated there would be no significant environmental impact resulting from this project.

Jim O'Connor, transportation manager for the City of Irving, said this project has been in the works for Irving for quite some time.

"[This extension] has appeared on the master thoroughfare plan I believe every year for the past 27 years," O'Connor said. "We've seen the need for this for a long time to open up southwest Irving for development. You

can see it happening even now, there's a lot of activity out there. The coming of the George Bush Turnpike has just accelerated it.

"To get from eastern Irving to western Irving and on into Arlington and Fort Worth right now, the only choices you have are 183 or go down to Rock Island Road and from there go south to Carrier Parkway. It's just not very convenient to go from east to west right now. Through its connection to FAA Boulevard, this extension will tie into FAA which continues all the way over into 360, which eventually will go all the way to 820 over in Fort Worth. It's a great cross-town route."

O'Connor hopes the project will ultimately provide travelers with a more convenient route to get from east Irving to west Irving.

However, even in these early stages some residents have reservations about the project. One Irving resident, James Shultz, is concerned about not only the increase in traffic, but the potential increase in noise affecting the residential areas around Conflans and Bear Creek.

"I cannot stress enough the traffic noise that comes from the 18-wheelers coming up and down Conflans from the belt of 161," Shultz said. "As you go into the other side from FAA and their

businesses, Conflans will have even more traffic from truckers. I'm all for transportation and shipping, but the heavy traffic between there is not a good fit."

Shultz also made the suggestion that 18-wheelers not be allowed to travel on the new extension.

After the public hearing, the next step is for the project to receive an environmental clearance, which is expected to take place August of the year. Construction on the roadway extension is scheduled to begin in 2023, and the project is expected to be completed in 2025.
